Mohammad Adnan

Backend Developer | 3 Yrs | Node.js, TypeScript, NestJS |
MongoDB, PostgreSQL | REST APIs, Microservices | AWS, Docker
Pune/Pimpri-Chinchwad Area

Summary

Hi, I'm Mohammad Adnan, a Backend Developer with 3 years of experience building scalable backend systems, REST APIs, and database-driven applications using Node.js and TypeScript. I specialize in designing secure, maintainable, and high-performance backend solutions using NestJS, Express.js, Hono.js, MongoDB, and PostgreSQL. My experience includes developing microservices, implementing authentication and authorization systems, optimizing database performance, and building cloud-based applications using AWS and Docker. Over the course of my career, I have worked on community platforms, inventory management systems, and appointment scheduling applications involving transaction workflows, RBAC, query optimization, real-time slot generation, and scalable backend architecture.

Core Expertise:

- Backend Development (Node.js, TypeScript, NestJS, Express.js, Hono.js)
- REST API Development & Microservices Architecture
- MongoDB, PostgreSQL, Prisma ORM & Database Optimization
- Authentication & Authorization (JWT, Firebase Authentication, RBAC)
- System Design, Scalable Architecture & Performance Optimization
- Docker, AWS, CI/CD, Agile Development

I enjoy solving complex business problems through clean architecture, efficient backend design, and production-ready software solutions. I'm continuously learning and exploring modern backend technologies to build systems that are secure, scalable, and reliable. Open to Backend Developer and Software Engineer opportunities where I can contribute to building impactful products and scalable platforms. Feel free to connect or reach out to discuss backend engineering, system design, or potential opportunities.

Experience

Broadstairs IT Solution Pvt Ltd
2 years 7 months

Back End Developer

January 2024 - Present (2 years 7 months)

Pune District

- Developed scalable REST APIs using Node.js, Express.js, NestJS, and Hono.js for production applications.
- Implemented secure authentication and authorization using JWT and Firebase Authentication.
- Designed database schemas and optimized MongoDB queries, improving API response times by up to 30%.
- Built backend services for community platforms, management systems, and database-driven applications.
- Created API documentation and testing workflows using Swagger, Postman, and Jest.
- Conducted code reviews and collaborated in Agile development cycles to deliver scalable software solutions.

Back End Developer

January 2024 - Present (2 years 7 months)

Education

Dr. Babasaheb Ambedkar Technological University (DBATU)

Bachelor of Vocational (B.Voc), Software Development · (August 2022 - May 2025)
